

# DUAL MASS FLYWHEEL CONVERSION KITS

King-O-Matic now offers a full line of Dual Mass Flywheel Conversion Kits for a variety of makes and models. The conversion kits are manufactured by Valeo, a major clutch component supplier.

All conversion kits contain the clutch disc, pressure plate and throw-out bearing, as well as a solid replacement flywheel. The new conversion kits will provide the same performance of a dual mass design without the potential failure.

These and other future applications produced by Valeo will provide a lower cost alternative to the original factory dual mass flywheel which can be quite costly.

**Note:** The repset reference number listed on most description lines is general in nature and may not address all specifics. More than one number may denote multiple listings or a dual mass conversion option. Refer to the specific listed in the guide, i.e. (year, engine, disc size, etc.).

Year	Engine			Disc Size	Description	Clutch Kit
	CYL	LIT	CID			
<b>Audi</b>						
<b>A4, A4 Quattro</b>
